ERT Group Achieves Two Additional Competencies in the Microsoft Partner Program

Boca Raton, Florida – March 27, 2008 — ERT Group today announced the company has earned two additional competencies in the Microsoft Partner Program; ISV/Software Solutions Competency and Data Management/Business Intelligence Solutions Competency respectively. The company, a Microsoft Gold Certified Partner, now has earned a total of three Microsoft competencies in the program.

Microsoft Competencies are designed to help differentiate a partner's capabilities with specific Microsoft technologies to customers looking for a particular type of solution. Each competency has a unique set of requirements and benefits, formulated to accurately represent the specific skills and services that partners bring to the technology industry.

The ISV/Software Solutions Competency recognizes ERT Group as having the highest skills in developing software solutions based on Microsoft technology. To achieve this status, ERT Group had to undergo a testing process to ensure its solutions can be easily integrated with Microsoft-based infrastructure. ERT Group's software development team has already developed a variety of software add-on tools allowing its customers to derive more value and productivity from their investment.

The Data Management/Business Intelligence Solutions Competency recognizes ERT Group's proven skills in implementing solutions that feature delivering services, tools, and application business intelligence using SQL Server technology.

"We're proud to see our expertise recognized by earning two additional Microsoft Solution Competencies. Receiving this recognition further endorses our desire to innovate and offer our customers best-of-breed technology solutions that meet and exceed their needs," said Michael Medipor, president of ERT Group.

ERT Group
